REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Puthran in U.S. Patent No. 4,633,053 has an electric discharge machine with replaceable electrodes including a magazine (see figure 8) with a pusher (element 64). Malkowski et al. has an electrochemical machining device with a tool changing mechanism. Check et al. in U.S. Patent No. 4,814,573 has an electric discharge machine with an exchangeable cartridge. Turner in U.S Patent No. 3,600,547 has a magazine holder for an electric discharge machine with an actuator rod (element 78) that pushes the lowest electrode through a slot (element 94) to an operation position where the electrode is held in place by stem (element 90, which acts as a clamp). None of the references of record discloses or suggests, alone or in combination, " an electrode dispenser positioned to deliver electrodes to said channel; and a slider slidingly received in said channel for advancing electrodes delivered to said channel from said dispenser to an electrode seating site located in said channel".

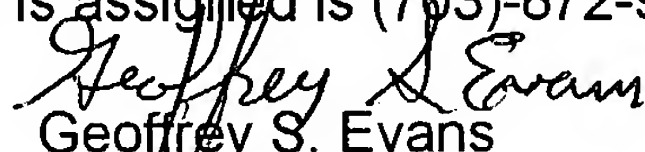

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
